# Recessed Track Kit

## RECESSED TRACK KIT

3m length

Part: 287FP-G

kit includes:

4 x Track supports

2 x Side Rails

8mm rod not supplied

## NOTE

- Kit only uses the 4mm Concrete-in Track below.
- Concrete-In Track & Track Joiner ordered seperately.

TRACK JOINER (11mm)  
Part: 287G19-JOINER

CONCRETE-IN  
TRACK  
Part: 287G19  
Length: 3m  
Steel: 4mm

Track is compatible with  
wheels to suit 19mm track.

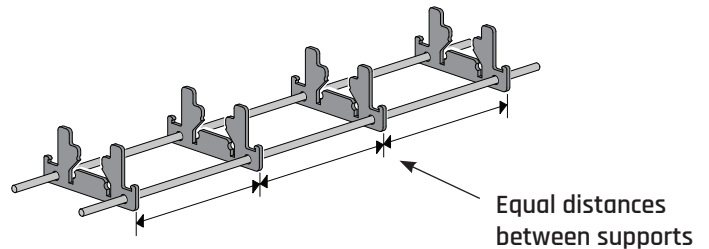

# kit assembly

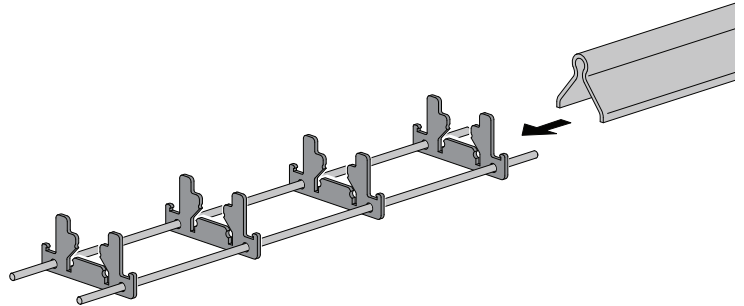

## TIPS

- Check track supports, side rails & track for damage.
- File off any burrs from the side rails to assist with the assembly process.

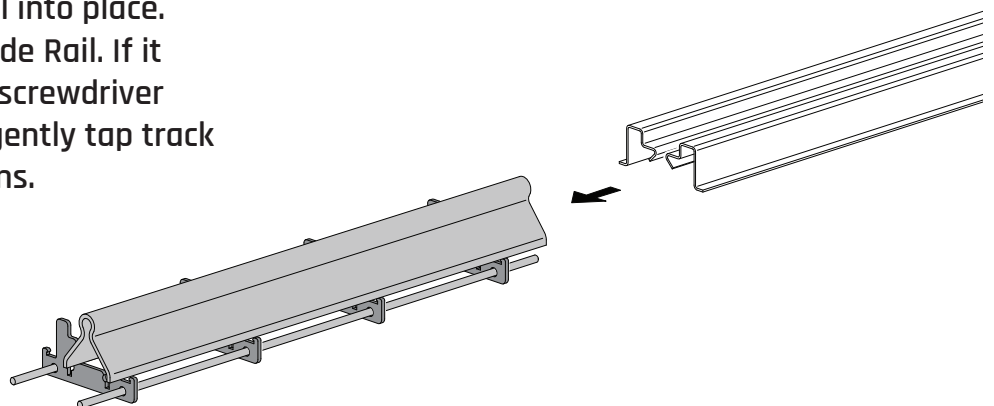

- 1** Feed 8mm rods through the track supports. Evenly space Track Supports along the 3m length will make assembly easier.

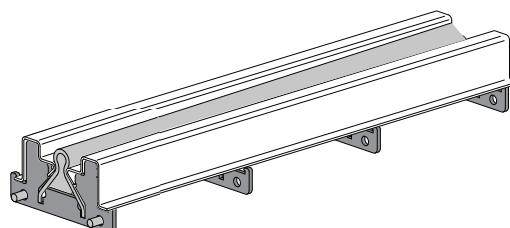

- 2** Slide track through the four Track Supports. The Supports may need a gentle tap into position during this process.

- 3** Slide the first Side Rail into place. Repeat with second Side Rail. If it jams, use a flat blade screwdriver and rubber mallet to gently tap track supports until it loosens.

- 4** The kit is now fully assembled ready for install.
